

## SolarEze announces their new SolarQuotes Platinum Rating for providing exceptional solar installations and customer service.

[SolarEze](#), a leading solar power company on the Gold Coast, has recently been awarded the [SolarQuotes Platinum Rating](#) for its exceptional customer service, quality solar installations, and proactive post-installation care. Founded in 2014 by Rob Scott, a qualified electrician and Clean Energy Council accredited solar installer, SolarEze is a locally owned and operated company that has quickly become a trusted provider of residential and commercial solar installations.

Australia is one of the sunniest countries in the world, which makes it an ideal location for solar energy generation. The abundance of sunlight, combined with the decreasing costs of solar technology, has made it increasingly popular for households and businesses across the country to install solar panels on their roofs.

The benefits of solar power are numerous. By generating electricity from sunlight, solar panels reduce

reliance on the grid, which can lead to significant cost savings on energy bills. Additionally, solar power is a clean and renewable source of energy that produces no emissions, making it an environmentally friendly alternative to fossil fuels. Installing solar panels can also increase the value of a property, as it demonstrates a commitment to sustainability and can be an attractive selling point for potential buyers.

SolarEze's commitment to customer service and high-quality installations has been recognised by SolarQuotes, an independent website that rates solar installers based on customer feedback. The Platinum Rating is a prestigious accolade that is only

awarded to companies that consistently provide excellent service, and SolarEze is one of the few solar installers in Australia to have achieved this level of recognition.

One of the key factors that sets SolarEze apart from other [Gold Coast solar installers](#) is its emphasis on transparency and trust. Founder Rob Scott believes that these qualities are essential for building strong, long-lasting relationships with customers. When dealing with SolarEze, customers can expect to receive honest and reliable advice, as well as ongoing support and assistance after their solar installation is complete.

SolarEze's commitment to customer service is reflected in the numerous positive reviews it has received from satisfied customers. Grant, a SolarEze customer, had this to say about his experience with the company: "Rob and his team were great with the install. Punctual and it was all very neat and tidy, the customer service was great. My new solar system has already saved me over \$1000 since it was installed, and I am in credit with my supplier. I cannot praise SolarEze highly enough!"

In addition to providing exceptional customer service, SolarEze also offers a range of financing options to make solar installations more accessible to households and businesses. This includes easy payment options and financing arrangements that can be tailored to suit individual needs and budgets.

Overall, solar power is becoming increasingly popular in Australia due to the abundance of sunlight, the decreasing costs of solar technology, and the numerous benefits it offers in terms of cost savings, environmental sustainability, and property value. SolarEze is a leading provider of [Gold Coast solar installations](#), and its commitment to customer service, quality installations, and proactive post-installation care has earned it the prestigious SolarQuotes Platinum Rating.
